

INNOVATIVE SOLUTIONS PLUS

Product Development

Innovative Solutions Plus uses a process management approach to provide a structure that is easily controlled, to deliver quickly what its client's are requiring. Product development overlaps the engineering design process, particularly if the new product being developed is of a bespoke or R&D nature. Every new product will pass through a series of stages, including concept, engineering design, manufacturing, assembly and testing as well as market introduction or commissioning. The five main segments that **Innovative Solution Plus** excels in for product development are:

Aviation GSE

- ❖ Aircraft Stairs
